Cypheria

We assist drivers and passengers in having engaging conversations.

Raihan • **Dandy** • **Louise** • **Bima**

Team members

Raihan

The leader of the cypheria team who did model development. He is ML Engineer

Dandy

The one who was working behind the scene. He is the Backend

Louise

Beauty and useful user interface is a key! He is the Frontend

Bima

Deploy the idea into a good pitch deck and the model into a good production system. He is the DevOps

Project Description

Hop into the AI-powered chat-mobile for a riveting chit-chat experience!

With a tap, passengers can pick their favorite topics and shoot a convo invitation to the driver.

No language barriers here - passengers can chat away in their native tongue, making communication as smooth as butter!

Problem Statement

No extra tip

No extra tip is given when the trip is not enjoyable. A lack of conversation leads to a less enjoyable trip, resulting in a reduced tip.

Awkward Silence

A long trip without conversation can lead to an awkward silence between the driver and passenger.
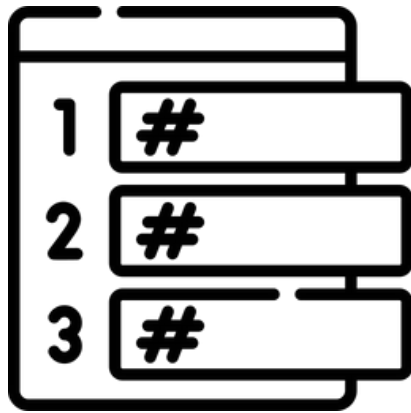

Solution

Initiate the Conversation

Start the conversation between the passenger and driver with an icebreaker, a fun fact, or an interesting topic.

Thousands of Curated Topics

Awkward silences can be... well, awkward. No need to fret, let AI come to the rescue by suggesting fascinating topics to keep the conversation flowing smoothly.

The Cypher

Topic curation for an exceptional conversation experience.

Indirectly promoting additional products

Enhance the Enjoyment of Extended Journeys

Future Roadmap

v1.0

v2.0

v2.5

v3.0

Conversation Initator

Facilitate engaging conversations between passengers and drivers by starting with an amazing opening.

AI Recommender

Inform passengers about the best and most unique food and attraction spots to visit during the trip.

AI Tour Guider

If the passenger approves of the AI recommendations, simply forward the request to the driver to follow the AI's suggestions.

AI Traveling Assistant

Plan, book, and discover an engaging driver with fascinating topics using AI technology.
Just a single click.
